Diff Fabrication Services

The following pictures show a customers diff that has been built using our Fully Floating Camber and Toe System, Watts Linkage Kit, Brake Kit, and Hub Adaptors.

The Customers Standard Diff is Checked on our Jig, and all bracket measurements are taken

A Suitable width Toyota Hilux Housing is selected and checked

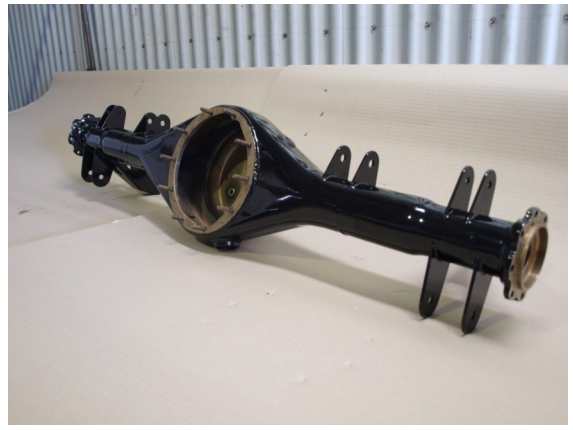

The Hilux Housing is measured, and the ends are cut and turned to size ready for fabrication

4 point alignment bar and spigots are fitted. New housing ends and all brackets tack welded on

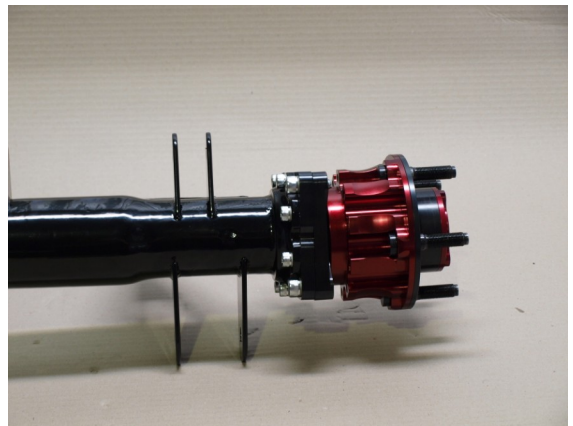

Fabrication completed, the housing is ready for re-finishing.

This housing has had our optional Powder Coat finish applied

The freshly powder coated diff housing is laid out with all of the components required for the kit, everything is double checked prior to final assembly

Toe wedges, spindles and fully floating hubs are fitted first

**Fully Assembled, complete with one of our Watts Linkage Kits, Kaaz LSD Centre, Race Products Brake Kit, and custom wheel adaptors.
We have many different options available, Please contact us for pricing to suit your car.**
