Circuit Brake Kits

Race Products have developed a Range of different circuit brake kits to complement our Camber, and Camber/Toe Hub Setups.

These kits are suitable for the following Camber systems:

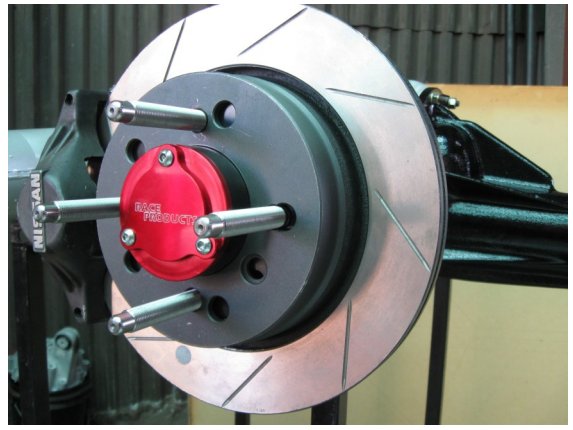

- 300 Series
- 400 Series
- 700 Series
- 750 Series

A number of different options are available, Fixed or Floating Rotors, Nissan or AP Calipers.

Our Floating Rotor Kits use a 278mm Diameter Rotor, sourced from a Formula 3 Car, coupled with a Disc Bell Made from Aircraft Grade Aluminium Billet

The Fixed Rotor is a 276mm Vented and grooved Rotor, that we machine to suit the application.

Our Standard Option for these kits is to use the Nissan 300ZX/Skyline Rear Caliper. These lightweight 2 piston calipers offer a powerful and cost effective solution for most customers.

Alternatively we can offer the same rotors with the option of AP Racing 2 Piston Calipers.

Race Products Circuit Brake kits come complete with all brackets and bolts to fit our Camber Hub Systems
