## 700 Series Camber/Toe Kits

The 700 Series is the original Race Products Camber Kit, designed from the start to fit the ever popular Hilux sized diff housing, this kit was initially designed as a bolt on option, offering up to 3 degrees of camber.

Continued improvement and development have also allowed us to offer this kit with a Toe Upgrade (using weld on housing end flanges).

This kit gives all of the safety benefits of a fully floating hub, and the performance advantage of Negative Camber and Toe Adjustments.

Featuring our own unique CV Ball Drive System, this kit has been well proven in top level competition, and is currently fitted on everything from club level Hill Climb cars, to Improved Production, and Neal Bates Championship Winning Toyota Celica Rally Car

Our 700 Series Camber Kit, uses Aircraft Grade 7075 Aluminium hubs as standard. (Steel Hub also available) .

To drive the kit and allow Camber and Toe changes to be made, we use our own ultra strong CV Drive EN26 Billet Axles. (on left) Barrel Spline Drive also available (on right)

Camber and Toe Changes are carried out by changing the Toe Wedges, or Camber Spindles as required.

We can also offer a full fitting and fabrication service (quotes available on request.)

All Kits are fully comprehensive and Include the following:

- EN26 Billet Axles (300m option available)
- All Hardware, Nuts Bolts Etc
- Quality Timken Bearings
- Steel Cased Seals
- Our unique locking system with preload spacers
- 1– 3.0 Degrees Camber Spindles available
- 0.5—2.0mm Toe Wedges available
- Special tools for axle fitment/removal, and spindle nut.
