Screw Adjustable Roll Centre Watts Link Kit

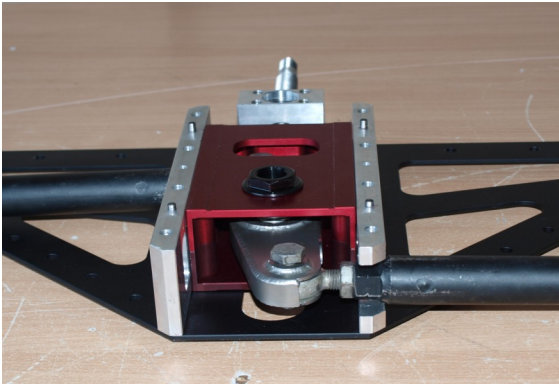

Introducing the new Race Products Screw Adjustable Watts Linkage Kit. Following the success of our original Universal Fitment Watts Link Kit with Peg Adjustable Roll Centre, Race Products have now developed the latest Screw Adjustable Version. Have an adjustable height rear roll centre will allow much more accurate fine tuning of your cars handling.

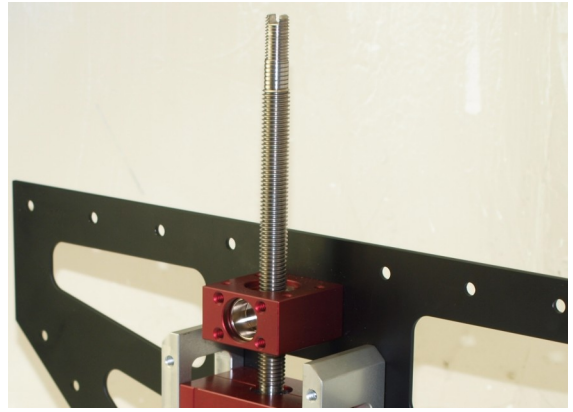

Now we have added the convenience and time saving feature of In-Car adjustment,

This kit is available in various sizes to suit different size cars, with different ride heights

The main component in the Screw Adjustable Watts Linkage, is the lift box. This 2 piece CNC machined component allows the entire Bell-crank Assembly to raise or lower within the body mount.

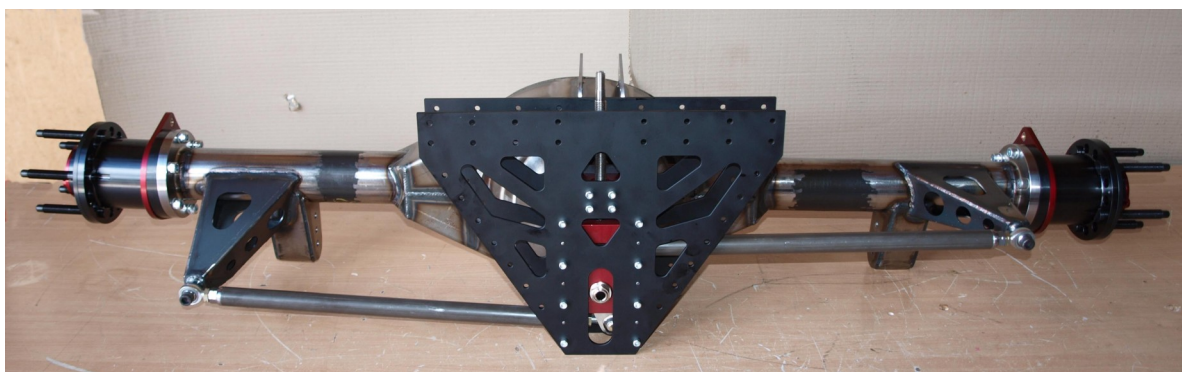

Adjustment is carried out quickly and easily, Using the screw adjuster, through the boot floor. Featuring a detent system to give positive and accurate "click" adjustments every 180 degrees. An optional remote cable assembly is under development

The Watts Link Bell Crank components are CNC Machined from 4130 Chromoly Steel before being fully Tig Welded, and Electroless Nickel Plated, before being fitted with a quality bearing.

Top quality USA Sourced Rod Ends are used Brackets are CAD drawn, laser cut, and CNC folded for accuracy. Watts Arms Are 4130 Chromoly Steel, and are supplied in unfinished lengths for custom fitment.
